

Logarithms Worksheet

This worksheet provides a direct way to apply the logarithmic functions to the displayed number.

[β]	Stores the “base” value to use in the LOG _β and ALOG _β .
[LOG_β]	Calculates the base “β” logarithm of the displayed number.
[ALOG_β]	Calculates the anti-Logarithm base “β” of the displayed number.
[LN]	Calculates the Natural logarithm.
[EXP]	Calculates the Natural Anti-logarithm or exponential.
[LOG₁₀]	Calculates the Common logarithm (base 10).
[ALOG₁₀]	Calculates the Common Antilogarithm (10 ^x).
[LOG₂]	Calculates the Common logarithm (base 2).
[ALOG₂]	Calculates the Common Antilogarithm (base 2).
[LOG₃]	Calculates the Common logarithm (base 3).
[ALOG₃]	Calculates the Common Antilogarithm (base 3).
